

# WINNING CHANGE

## Union membership on the rise!

**The union movement is growing!**

**New data released from the Australian Bureau of Statistics yesterday shows that union membership has gone up by 12.3% in the past two years!**

And even better: the data confirms that **union members earn more.**

**Union members earn \$1,600 per week compared to \$1,350 for non-members (on a median basis).**

Workers are joining because every day unions are standing up to protect workers' jobs,

safety and rights.

Coming together as union members is our best defence against big business and Dutton's plans to take workers' rights and wages away.

**What are you waiting for? Today's the day.**
